PROJECTS

● Movie Review System

[Github Link](#)

The Movie Review Web Application is a comprehensive platform designed for film enthusiasts to explore, review, and engage with a diverse array of movies. Users can create personalized accounts, leveraging seamless authentication methods, including social media integration. The app interfaces with a robust movie database, offering a wealth of information encompassing cast details, release dates, synopses, and ratings.made with react js, node js and mongo db.

● Todo List

[Github Link](#)

It's a web based Application made with react js In which user can add the todo's as per requirement of their own and also delete that todo's when the work has been done
